

## Parent Information Letter: Web to One Initiative

At Campbell Union School District, we strive to provide our students and their teachers with the best opportunities for teaching and learning. We believe strategic technology integration is key in supplementing an authentic, engaging, and relevant learning environment. We believe that learning should be fun, self-directed and should not be constrained to traditional spaces, school days, or hours. We believe in providing expanded access to the web to every one of our students, the purpose and goal of the Web to One Initiative. The Web to One Initiative will provide students with a Chromebook that they will use each day, both at home and at school. For more information, please visit <https://www.campbellusd.org/webtoone>.

Equitable access to the web can only be achieved through expanded access to the web. This initiative will afford all of our students more personalized and engaging lesson content while supporting all of our students as they become more adept at taking charge of their learning, managing their time, and practicing responsibility. This directly aligns with our Profile of a Graduate as we work to build the competency of self-direction.

### **Profile of a Graduate**

Making take-home devices available for students in need will allow all of our students access to more personalized and engaging lesson content while supporting them as they become more adept at taking charge of their learning, managing their time, and practicing responsibility. This directly aligns with our Profile of a Graduate as we work to build the competency of self-direction and allows students equitable access to online materials and resources. A focus of this initiative is also digital citizenship, which is the responsible use of technology. Your child will learn and practice digital skills, ethics, etiquette, and online safety.

### **How might homework look different?**

Students will have access to Google Classroom where teachers will post traditional homework along with interactive assignments. Homework may include a short video on different concepts meant to probe their thinking and spark interest. It might also include interactive lessons that let students practice examples, summarize, and question what they don't understand. Allowing all students access to richer and more engaging content outside of school allows the teacher

to maximize their face to face time with students in the classroom, personalizing learning and providing more time for students to apply their new knowledge through collaborative project work.

### **What does this mean for my student?**

- Students are expected to complete their homework as assigned.
- Students have the ability to watch video content at their own pace, re-watching, rewinding, and pausing when needed.
- Absent students will not miss out on instruction, they always have access to class content.
- Students are not expected to have full mastery of homework assignments but are expected to come to class prepared and ready to participate in discussions, group assignments, and other assigned tasks.
- Students are encouraged to bring any questions or concerns to their teacher's attention at any time.

### **What does this mean for me as a parent?**

- It enables you to be more involved in your child's education.
- You have access to video content and are able to see how lessons are taught.
- You are able to have meaningful content related discussions with your child.
- You can encourage your child to take their time while watching video lessons and remind them to re-watch, rewind, or pause when necessary to make sense of what is being taught.
- You are encouraged to bring any questions or concerns to the teacher's attention at any time.
- As we build student responsibility for bringing the device safely both to and from school, should your student forget his device at home, a limited number of devices will be available for check out.

### **What if students don't have access to technology/internet at home?**

Since students will be required to access class content for homework via the internet, the following system is being created to meet the needs of all learners:

- Students are welcome to come to campus before or after school to view content. Facilities and network connectivity will be made available 30 minutes before school starts and 60 minutes after school ends.

- Families who qualify for the National School Lunch Program are eligible for the Comcast Internet Essentials programing, providing home internet and wifi for \$9.95 a month, plus applicable taxes. For more information, please consult the Comcast Internet Essentials website at <https://www.internetessentials.com>
- Families who qualify for the National School Lunch Program may be eligible to receive a hot-spot, providing cellular network internet for their Chromebook at home. Please obtain and fill out the HotSpot interest form from your middle school's front office to help CampbellUSD determine the number of families needing service.

### **Online Security and Web Filters**

Student chromebooks are equipped with web filter software from Securly. This software provides us a cloud based filter so we maintain an age appropriate internet space as well as a way to monitor for cyber bullying and self-harm alerts. You can learn more about Securly by visiting their website: [www.securly.com](http://www.securly.com)

### **Liability**

Just like textbooks, library books and other education materials, Chromebooks will be checked out to individual students and those individual students will be responsible for the care of the device. Students are responsible for any costs associated with repairing or replacing district property.

CampbellUSD Chromebooks will be self-insured during the 2019-20 school year. This optional insurance will be provided by CampbellUSD and costs \$33.00 annually. It covers the cost of repair or replacement of a device due to accidental damage or theft, with no deductible. Sign up by completing the attached document and returning it to the front office with \$33.00 in cash or check made payable to Campbell Union School District.

Any repairs to uninsured Chromebooks will be performed District personnel, and charges will be based on the following:

- Trackpad & Keyboard: These repairs are normally necessary when the trackpad or keyboard have been intentionally damaged by removing the keys or peeling up the trackpad. Full keyboard replacements are \$40.00 and trackpad replacements are \$15.00.
- Screen: These repairs are normally necessary when a device has been dropped or the lid is closed on top of an object. The cost of replacing a screen is \$40.00
- Battery: Battery issues are relatively rare, and repairs will typically be covered by the District due to normal wear and tear on the device. Students will be responsible for any repair cost if it is determined that there is deliberate and intentional damage to the battery. Battery replacements are \$30.00 under these circumstances.

- Full Replacement: If a device is lost or damaged due to liquid spills, the cost of replacing the Chromebook is \$320.00

**Rollout**

The Web to One Initiative began in the 2018-2019 school year. Students who received a Chromebook last year will receive the same Chromebook back to them. The Chromebooks are viewed as instructional materials and will be handed out during the textbook checkout process. New devices will be handed out to sixth grade students and newly enrolled seventh and eighth graders. If you do not wish for your child to participate in the Web to One program, please complete the opt-out form available in your middle school's front office.

**If your child receives free school lunches, you may qualify for Internet Essentials from Comcast.**

Bring the Internet home for just \$9.95 a month.

The world has gone digital. Internet service has become essential for success. That's why we created Internet Essentials. It's available to households with children who receive free school lunches under the National School Lunch Program.

While participating in Internet Essentials, customers will receive:

- Affordable Internet at \$9.95 a month, plus applicable taxes with no price increases, no activation fees, and no equipment rental fees.
- A low-cost computer, available at initial enrollment, for \$149.99 plus applicable taxes
- Free Internet training, available online, in print and in person

Get fast internet service so the whole family can enjoy:

- Email
- Homework
- Sharing photos
- Job searches
- Paying bills online
- Watching videos
- Downloading music
- And so much more!

Sign up today! Call toll-free: 1-855-8-internet (1-855-846-8376). For more information visit: [InternetEssentials.com](http://InternetEssentials.com).

Restrictions apply. Not available in all areas. Limited to XFINITY® Internet Economy service for new residential customers meeting certain eligibility criteria. Advertised price applies to a single outlet. Actual speeds vary and are not guaranteed. After initial participation, if a customer is determined to be no longer eligible for the program but continues to receive Comcast service, regular rates will apply. Subject to Internet Essentials program terms and conditions. Call 1-855-846-8376 for restrictions and complete details, or visit [InternetEssentials.com](http://InternetEssentials.com). ©2011 Comcast. All rights reserved. Internet Essentials is a program to provide home Internet service for families. It is not a school program, and is not endorsed or required by your school. Your school is not responsible for Internet Essentials accounts.

If your child receives free school lunches, you may qualify for Internet Essentials™ from Comcast.

## CampbellUSD Web to One Insurance Form

Campbell Union School District has elected to self-insure Web to One Chromebooks during the 2019-20 school year. This optional insurance plan will protect the device against an assortment of damages and will provide full replacement cost coverage. This policy is also transferable to a replacement unit.

**CampbellUSD insurance covers:**

- Accidental Damage (Drops & Spills)
- Cracked Screen
- Liquid Submersion
- Fire, Flood & Natural Disaster
- Power Surge by Lightning
- Theft & Vandalism

**CampbellUSD insurance does not cover:**

- Cosmetic Damage

**Coverage Details for SY2019-20 Policy Term:**

Device	Coverage	Deductible	Price
Acer C732	\$325.00	\$0.00	\$33.00

To purchase with cash or check, return this completed form and \$33.00 to the Monroe Middle School front office. Checks must be payable to Campbell Union School District.

☐ I would like to purchase insurance on my student's Chromebook for the 2019-20 school year for the cost of \$33.00.

**Complete this form only if you want to revoke your student's access to a Web to One Initiative take-home device**

Dear Parent/Guardian:

At Campbell Union School District, we strive to provide our students and their teachers with the best opportunities for teaching and learning. We believe strategic technology integration is key in supplementing an authentic, engaging, and relevant learning environment. We believe that learning should be fun, self-directed and should not be constrained to traditional spaces, school days, or hours. We believe in providing expanded access to the web to every one of our students, the purpose and goal of the Web to One Initiative.

It is our hope that all middle school students participate in this take-home initiative and we encourage everyone to participate. District-issued Chromebooks are configured with web-filtering software, device-specific settings, tools and applications, and are guaranteed to be compatible with assignments issued by CampbellUSD teachers. In addition to these protections, District-issued Chromebooks are maintained and repaired by District personnel to ensure that they are reliable and ready for student use.

Parents/Guardians have the right to terminate their student's access to a take-home District-owned device by signing this Opt-Out form. Families may choose to not participate in the initiative, and instead use a computer of their choice at home. Those who have their own device at home and choose to not participate in the Web to One Initiative **will not** be able to bring their personal device for classroom use, due to concerns regarding instruction, liability, technical support, and security.

In addition, families who do not participate **will not** be able to check-out Chromebooks from the library for take-home use while their personal devices are broken, being repaired, or are otherwise unusable.

This Opt-Out will remain in effect for one school year, and expires at the end of this school year. A parent or guardian must complete a new Opt-Out form every school year.

If your student already has a device checked out to them, they must return the device upon submission of this form.

Please write your initials in the blank next to the statement, complete the other information below, and sign and return this form to the main office at your student's school. If you are denying access for multiple students, you must complete a form for each student.
